5230

4
5 Prevention of Disease Transmission

6
7 All District personnel will be advised of routine procedures to follow in handling body fluids.
8 These procedures, developed in consultation with public health and medical personnel, will
9 provide simple and effective precautions against transmission of diseases to persons exposed to
10 the blood or body fluids of another. The procedures will follow standard health and safety
11 practices. No distinction will be made between body fluids from individuals with a known
12 disease or infection and from individuals without symptoms or with an undiagnosed disease.

13
14 The District will provide training on procedures on a regular basis. Appropriate supplies will be
15 available to all personnel, including those involved in transportation and custodial services.
